## **DETAILED ACTION**

### ***Specification***

The disclosure is objected to because of the following informalities: References to claim numbers in the specification pages 1 and 3 is not allowed.

Appropriate correction is required.

### ***Claim Objections***

Claims 1-3 are objected to because of the following informalities: Reference characters should be removed from the claims. Appropriate correction is required.

Claim 3: "holder" found on line 4, should be changed to ---groove---.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 3 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 3 is directed towards a different embodiment than claim 1, and appears contradictory because it does not require the salt core to be pressed into the turned groove, rather it requires a pre-formed salt core to be placed into the groove with an adhesive.

***Allowable Subject Matter***

Claims 1-2 are allowed.

The following is a statement of reasons for the indication of allowable subject matter: The prior art fails to teach the claimed method for producing a cooled ring insert including pressing a salt granulate into a groove in the ring insert at a pressure of 100 to 300 N/mm<sup>2</sup>, preheating the ring insert, then dipping the preheated ring insert with the salt granulate core into an alfin bath of aluminum.
